TO the practical mechanic, this design will be of interest, as it shows the scaffolding necessary in redecorating so large an interior.

To our friends arriving in Chicago at the Park Row Station, we suggest they notice the harmony of color, and the soft, velvet effects produced by the two shades of Buff Velour Finish recently used.

Finished with Devoe Velour Finish

THIS design of a residence hall is to show the color effect of using Devoe Velour Finish; No. 851 Light Peach on the side walls; No. 854 Yellow Tint on ceiling; Devoe Stencil No. 487; with No. 846 Rich Maroon and No. 847 Bright Sage, for stencil colors. The woodwork could be made to harmonize, by using Devonian Stains of darker oak shades, mission effect; or if a gloss or semi-gloss finish is desired, Devoe Pale Interior Varnish should be used, left natural for gloss, or rubbed for semi-gloss finish.

PARLOR

THE library does not admit a wide range of color, more solid effects being desirable. Our suggestion shows Devoe Velour Finish No. 847 Bright Sage on side wall, with Sap Green Glazing Color; No. 852 Light Brown on ceiling with Indian Yellow Glazing Color; stencil No. 430, using ceiling color for side wall stencil, and vice-versa.

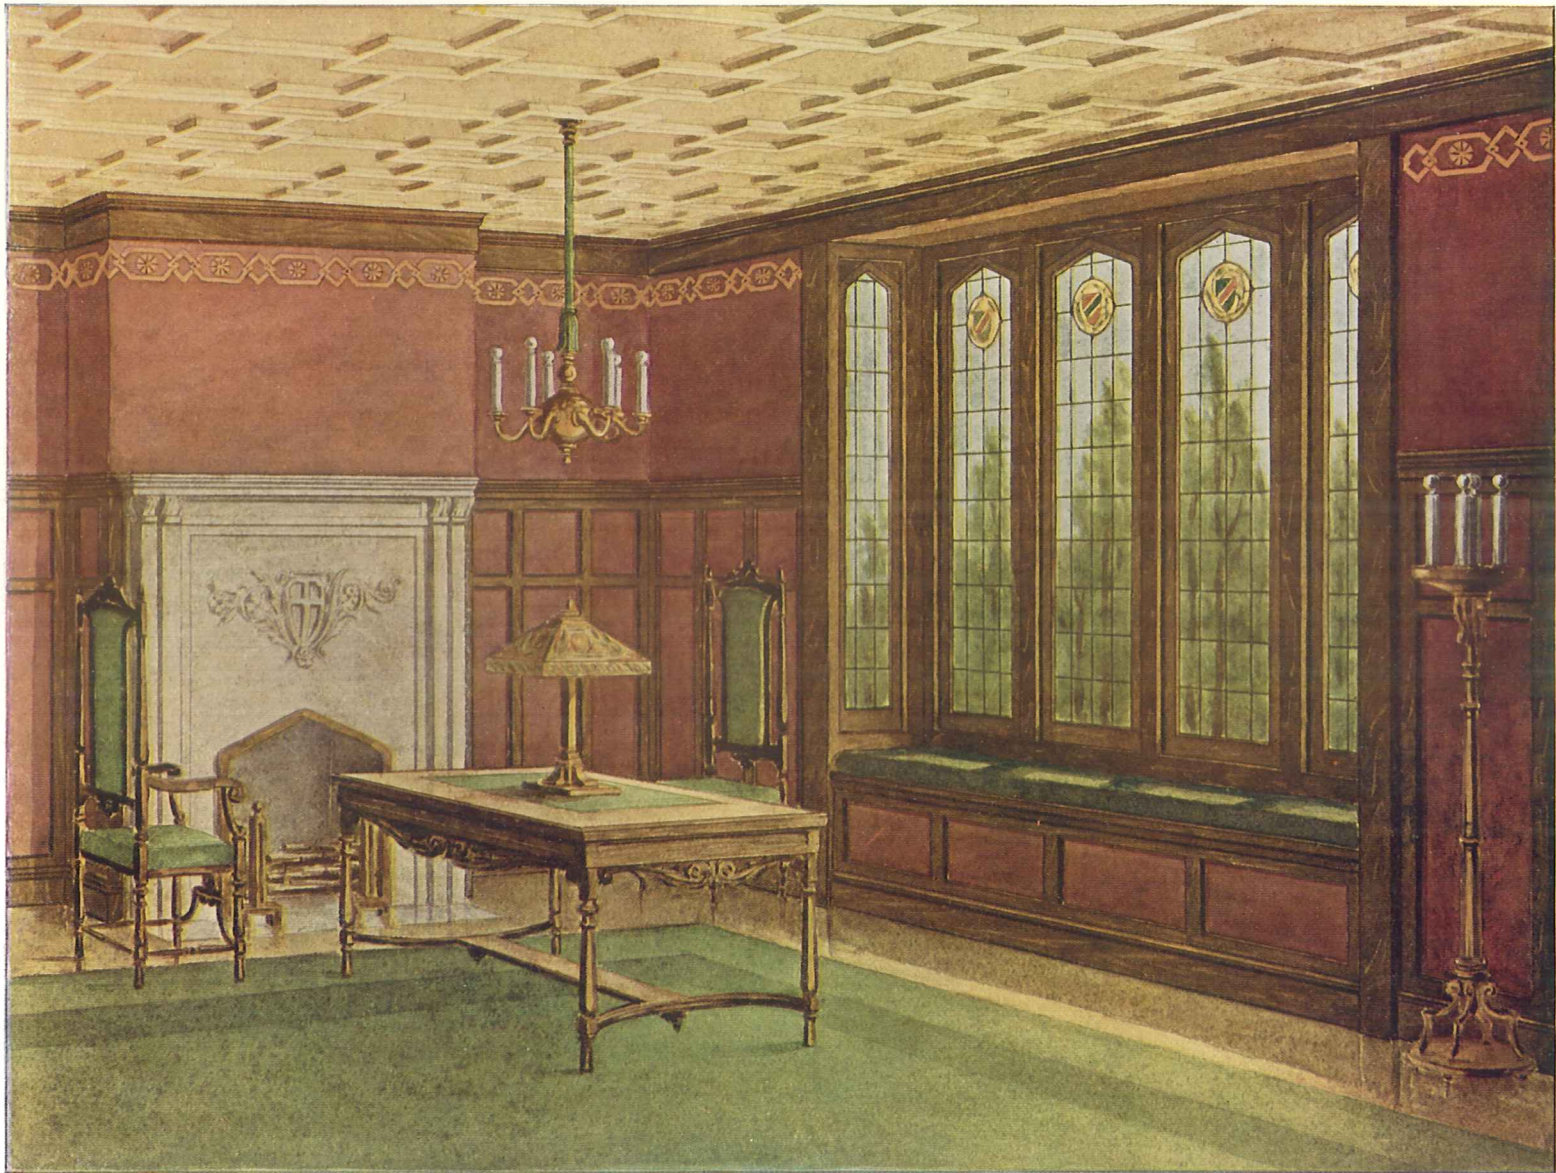

Woodwork, Devonian Stains, antique or mission effect.

AN English room suggests only a heavy and substantial color scheme. This is shown by Devoe Velour Finish No. 846 Rich Maroon on side walls; No. 833 Ivory for ceiling; Stencil No. 473; with No. 852 Light Brown for stencil color.

Dark Antique or English Oak for the woodwork; Devonian Stains.

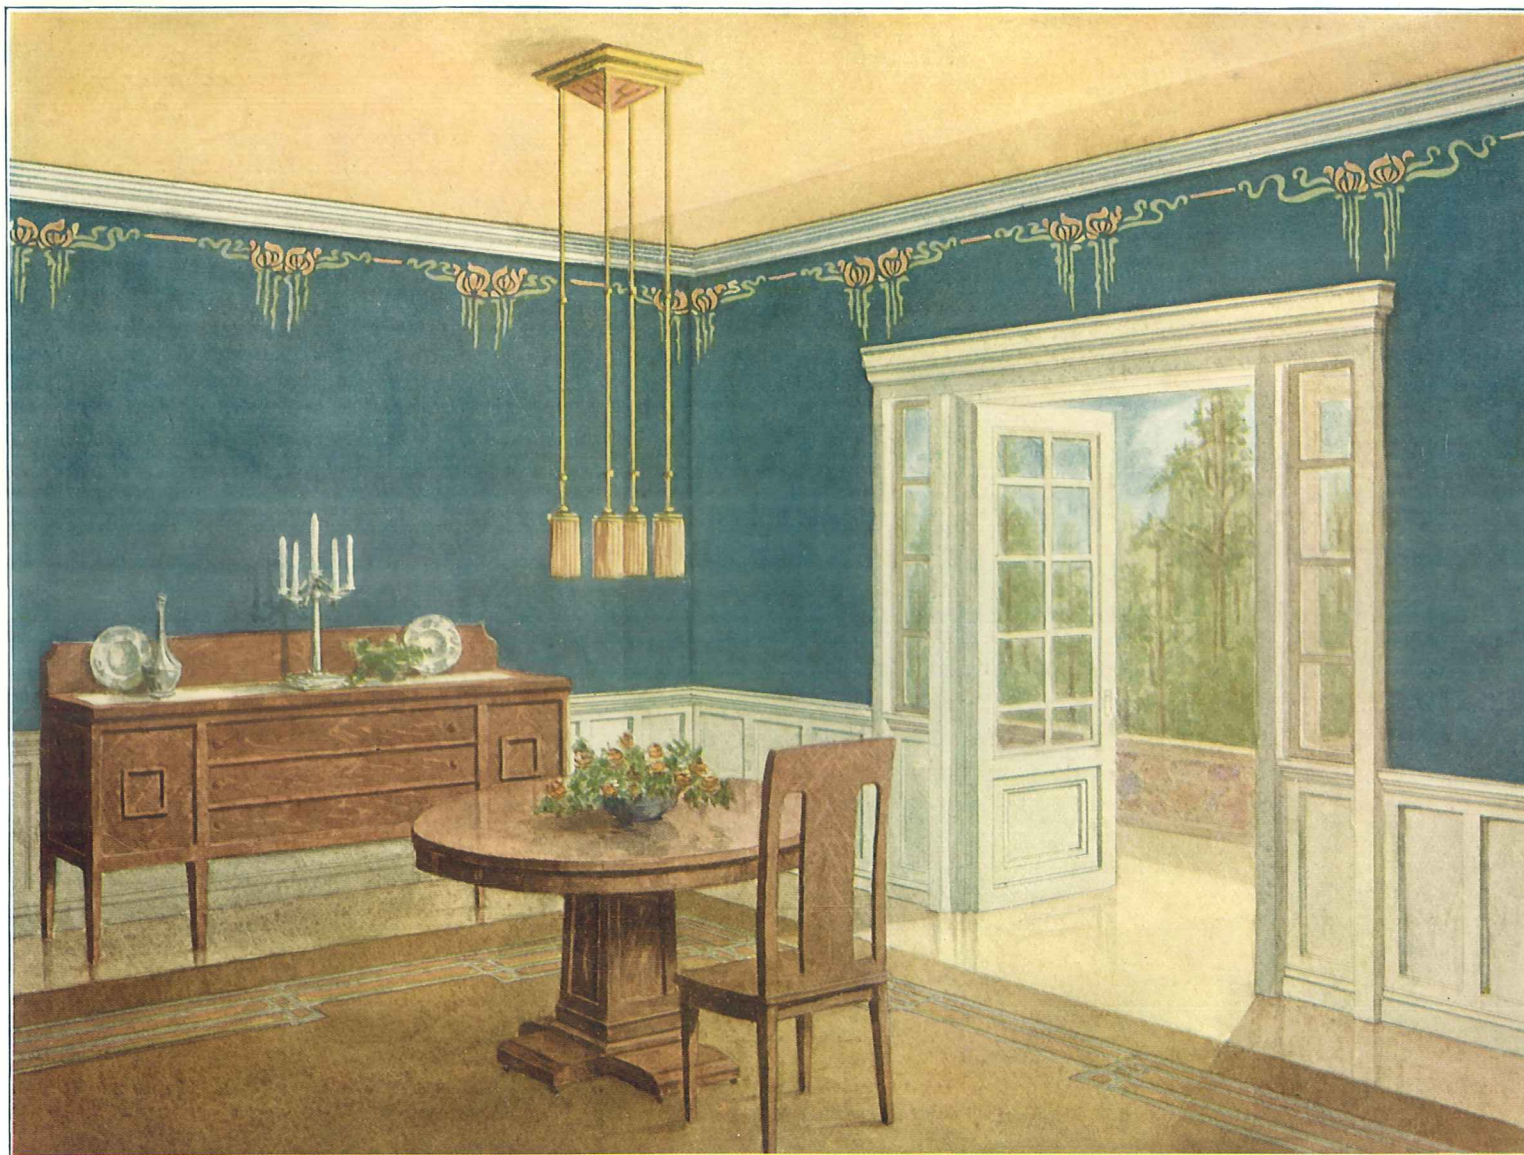

ENGLISH LIVING ROOM

CHEERFUL surroundings mean so much more where the interior of a room is considered, than it does to a house. This breakfast room is a delight, due largely to the color scheme.

BREAKFAST ROOM

THE sewing room, the ladies' work room, can be treated with such a large variety of color combinations, agreeable to individual tastes, that we simply suggest the design as one of many.

SEWING ROOM
Devoe Velour Finish

THE sitting room or ordinary room in so many homes, is ordinary because of its lack of suitable decoration.

Few colors are more attractive than a rich golden brown, hence our suggestion. Devoe Velour Finish No. 853 Golden Brown on side walls; No. 856 Warm Cream on ceiling. Stencil No. 476; stencil color No. 844 Delft Blue.

Woodwork can be finished with Devonian Stain, light shades of oak or golden oak; gloss or flat finish.
